

NAME: Elena Lee Reeder

OCCUPATION (optional): Trustee (Incumbent / President)

Protecting the Natomas Basin from flooding requires strong leadership, careful planning and responsible stewardship. Since being elected to the Reclamation District 1000 Board in 2019, I have worked with property owners, fellow trustees, agencies and community partners. I have served as Board President since 2022.

Our priorities are clear: maintain the 42 miles of levees protecting the basin, address interior drainage needs, support completion of flood-protection improvements, and deliver projects on time and within budget. During my tenure, the Board completed a Proposition 218 process to secure the District's financial health, maintain cost sharing while recognizing that residential, agricultural and habitat interests must work together to serve the Natomas community responsibly.

For five years, I have represented Natomas and Sutter County interests at the Sacramento Area Flood Control Agency as a director and alternate. I also serve as Vice-Chair of the Central Valley Regional Water Quality Control Board, advocating for water quality and regional protection.

A longtime Sacramento-area resident, UC Davis graduate and public-policy professional, I am committed to achieving at least 200-year flood protection and maintaining the infrastructure entrusted to RD 1000 for families living and working in and around the Natomas Basin.

I respectfully ask for your vote.
